Introduced in 1994, **Strataglass™** is a premium, flexible (it rolls up!) coated vinyl sheet engineered to resist the damaging effects from the sun's rays, environmental fallout, and scratching from handling. It also blocks out 100% of the spectrum of UV light. Today, Strataglass is the stable of virtually every quality canvas manufacturer.

Strataglass™ is a scratch resistant, UV blocking, coated press polished vinyl. What makes **Strataglass™** so obviously superior starts with the raw material, the chemical makeup of the calendared vinyl. Ordinary vinyl is loaded with "UV inhibitors"; this chemical additive makes the vinyl appear as blue in color, even hazy. **Strataglass™** introduces only a minimal amount of UV inhibitors into the vinyl, then adds a UV blocking coating to the surface of the vinyl. The coated vinyl is then press polished for a superior finish.

A **Superior Vinyl** Alternative.....From center consoles to mega yachts, **Strataglass™** has been used by the most discriminating canvas shops in the world for the past six years.

Full Sheet Size = 54" x 111" (1.37 m x 2.82 m)

Thicknesses: .030 and .040 mils

PRICING

Size	Strataglass - 30 mil	Strataglass - 40 mil
1 yard 36" x 54"	\$ 140.00	\$ 150.00
1/2 Sheet 55" x 54"	\$ 175.00	\$ 225.00
Full Sheet 111" x 54"	\$ 225.00	\$ 280.00
5 Sheets	\$ 900.00	\$ 1,000.00

CARE & MAINTENANCE

We recommend using **only IMAR Products**. **IMAR Strataglass Protective Polish**, **IMAR Strataglass Protective Cleaner**, and mild soap (preferably **IMAR Yacht Soap Concentrate**) on Strataglass. Use of harsh cleaners like *Simple Green* and/or *pine* will dull the curtains quickly. After September 30, 2004, using any other product(s) void the factory warranty

- **Warning** *Use of **RAINEX** on Strataglass appears to work for a short time but then dulls the surface and presents an "Orange Peel" effect. Do not use **RAINEX**. *Use of cleaners, polishes, scratch removers, or any other product made for regular, uncoated vinyl will damage STRATAGLASS. Do not use these products * **DO NOT HANDLE STRATAGLASS (OR ANY VINYL) WITH SUNSCREEN ON YOUR HANDS!** This will permanently cloud the vinyl where handled.

When New: 3M Adhesive Remover may be used to remove glue left from fabrication. Final clean with IMAR Strataglass Protective Cleaner. We recommend using IMAR Strataglass Protective Polish as the final step in installation to provide a base of protection and good watershed.

Ongoing: We recommend using IMAR Strataglass protective Polish every 1 to 2 months. In the interim, use IMAR Strataglass Protective Cleaner frequently.

Note: All new vinyl can easily get impressions in itself. We recommend new enclosures be left in place to the extent possible. If completely removed, enclosures must be interleaved with either acid-free paper (available from framing shops) or old sheets (the best choice) to prevent "pooling" in the glass, vinyl "seasons" over time and becomes less impressionable. Roll all curtains down and fasten in place nightly to keep perfect appearance.

Cleaning: Flush thoroughly to cool the surface and rinse away environmental abrasives. Wash with IMAR Yacht Soap Concentrate, or other equally gentle and high quality soap. Do not use Simple Green, Or pine or any other harsh cleaner - they will dull the surface. Apply the soapy water to the clear vinyl section of the curtain with special purpose washing mitt or soft cotton cloths. Thoroughly rinse the soapy solution with fresh water and completely dry the curtains with a high quality chamois. (Swobbit.com makes several tools to make these tasks easier.) Your clear vinyl curtains should be washed whenever your boat is washed. After washing the curtains, apply IMAR Strataglass Protective Polish sparingly with small, light circular motions using a soft cotton cloth. Allow the polish to dry and then remove with a clean soft cotton cloth. Finally, lightly buff to a sparkling shine. Done. For routine maintenance between polishing, use IMAR Strataglass Protective Cleaner. Insure the clear vinyl panels are free of abrasives. Very lightly mist a soft cotton cloth. Lightly and briskly rub a manageable sized area and then lightly buff dry with another clean cloth. Done. We recommend using IMAR Strataglass Cleaner at least weekly but it's so fast and easy you may want to do it daily. You'll love the shine.

Restoring: We once recommended a restoration process but extensive experience shows actual damage cannot truly be repaired. If IMAR Strataglass Protective Polish cannot restore the clarity and shine, it may be time to consider replacing the enclosures. Please...Please...use our recommended procedures and products from the beginning
